

TAKE CONTROL OF YOUR COMM-UNITY WITH ADMIN PANEL

NetFortris Comm-unity delivers the most powerful communications features in the market, but managing them couldn't be easier. The Comm-unity Admin Panel lets you control your users, features, routing, reporting and more — all through a simple and intuitive interface. No technical expertise required.

Oversee Your Comm-unity At a Glance with Our Graphical Dashboard

Your Comm-unity Admin Panel provides you with a customizable graphical dashboard showing all of your important metrics. Simply click on any graphic to dive into a detailed report or refine default graphs.

ONE NAV BAR TO RULE THEM ALL

Control every aspect of your Comm-unity account through a collapsible, left-sided navigation bar that gives you instant access to the tools you need to customize your communications experience.

Organization

Manage users, sites, departments and groups, companywide with ease.

Devices

Set up phones, hotdesking, extensions, phone numbers, conferences, licenses, roles and permissions.

Call Center

Specify call queues and queue recordings as well as initiate real-time monitoring and queue alerts.

Inbound Call Routing

Manage all aspects of call routing, including call sequences, prompts, music playlists and more, all from a simple visual interface.

Reports & Audits

Schedule and save reports, on call detail, agent status, queue summaries, abandoned calls, audit logs and more.

Settings

Manage company preferences, bulk uploads, active directory sync as well as manage key codes and SSO options.
