CIRCUIT FAILOVER

Deploying multiple circuits at your branch is the easiest way to ensure your connectivity is protected.

MANAGED CONNECTIVITY OPTIONS

Traditional Backup

DSL/Cable	EoC
Fiber	T1

Wireless 4G Backup

- Flexible data plans and options
- Multiple carrier deployments

CONFIGURATION OPTIONS

Active / Active

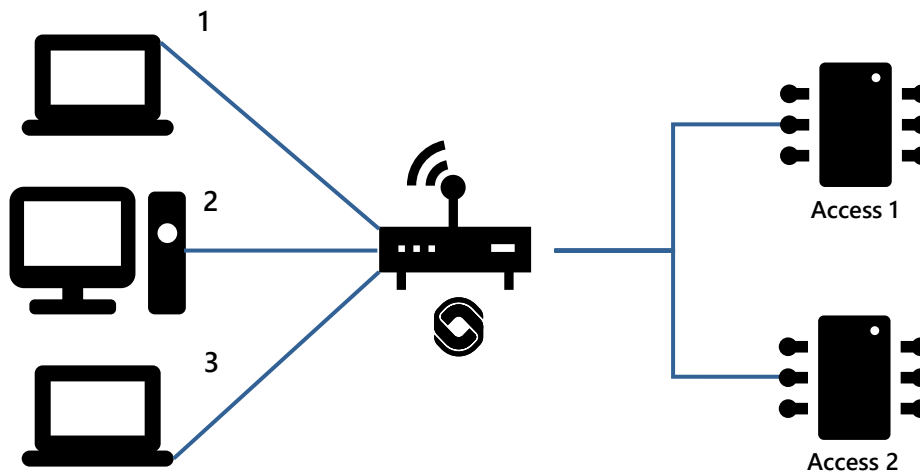

Use Case: Dual DIA Circuits

Managed traffic runs over two circuits simultaneously. If one goes down, all traffic will be sent over the remaining circuit.

Active / Passive

Use Case: MPLS with DIA Failover

All managed traffic runs over a primary circuit. A secondary circuit is ready in case you experience a loss in service.

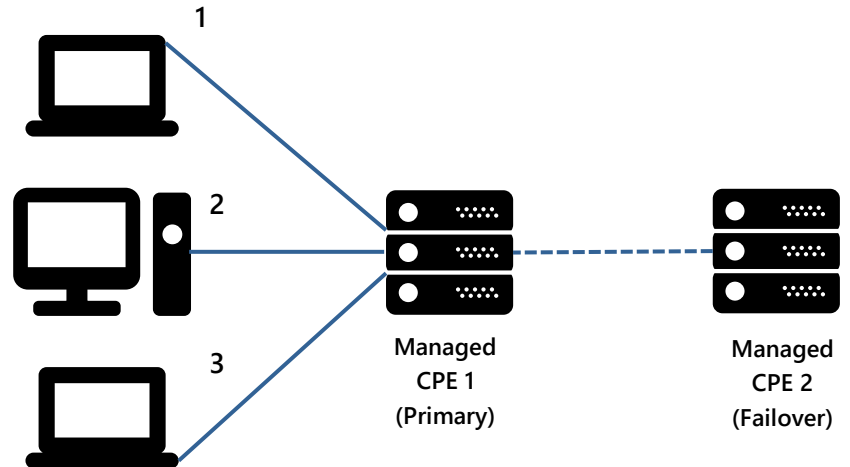

CONTACT US TODAY TO PROTECT YOUR BUSINESS FROM NETWORK DOWNTIME.

HARDWARE FAILOVER

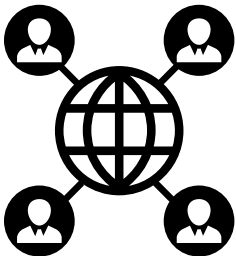

Protect your local network from unforeseen hardware failures, with High Availability solutions from NetFortris.

Automated hardware failover keeps your business running with the least possible interruption.

SD-WAN FAILOVER

For customers who want the most amount of flexibility and control, use SD-WAN to dynamically failover and protect business critical traffic.

Total Control WAN benefits for network backup:

- Route traffic over multiple access types simultaneously
- Forward error correction to mitigate degraded link issues
- Deep packet inspection to route specific application traffic
- Packet-level failover supports real-time traffic such as VOIP and video
