

AT-HOME SD-WAN BY NETFORTRIS – BUSINESS-CLASS CONNECTIONS FOR REMOTE WORKERS

The home office is the new branch office. Many businesses are embracing both permanent remote and hybrid home + office work environments for continuity and cost savings.

Cloud-based applications make flexible work options possible, but residential networks don't meet the security, uptime and quality requirements that your corporate network demands. Enterprise SD-WAN solutions can help but are too costly to deploy beyond the C-suite.

AT-HOME SD-WAN BY NETFORTRIS FILLS THE GAP

At-Home SD-WAN by NetFortris leverages capabilities of enterprise SD-WAN without the enterprise price tag. Our cost-effective solution improves the performance of congestion-prone consumer broadband by:

✓
Segmenting business and home traffic

✓
Ensuring the privacy of personal traffic

✓
Prioritizing business traffic

Virtual Desktops

Cloud Applications

Screenshare

Video Meetings

VoIP

Virtual Call Center

UCaaS

KIDS STREAMING VIDEO OR GAMING ONLINE? NO PROBLEM!

At-Home SD-WAN delivers secure, high-quality and uninterrupted connectivity for business applications that require stable links.

A BETTER NETWORK FOR BUSINESS AT HOME

At-Home SD-WAN by NetFortris provides a clear advantage to work-from-home environments at a right-sized subscription rate that's affordable for organizations of all sizes – from small office/home office (SOHO) to multilocation enterprises.

BENEFITS OF AT-HOME SD-WAN BY NETFORTRIS

With At-Home SD-WAN, you experience all the benefits of enterprise SD-WAN by NetFortris, including:

Bandwidth Aggregation

Aggregate bandwidth using any access type – cable, DSL, 4G LTE – from any service provider.

Reliable Connections

Enjoy always-on connections with seamless failover and dynamic path selection.

Quality of Service

Improve performance of cloud, voice and video with application prioritization and QoS policies.

Integrated Security

Keep critical cloud and peer-to-peer apps secure with integrated firewall and IPsec VPN.

Centralized Control

Make changes globally or by connection, location, app, device or user with our intuitive portal.

24/7 Management

Rest assured your connections are working properly with round-the-clock expert monitoring.
