

## BUSINESS CONTINUITY BY NETFORTRIS – KEEP YOUR BUSINESS CONNECTED & PROTECTED

Your business operations can be disrupted by natural disasters, power failure, lockdowns, network outages, cyberattacks and more.

With Business Continuity by NetFortris, your business can stay up and running even if there is a sudden change in your work environment.

Zone	Solution	Benefit
Application	Comm-unity – Unified Communications as a Service (UCaaS)	Work Anywhere
	Comm-unity – Virtual Call Center	Remote Agents
Security	Total Control – Virtual Private Network (VPN)	Secure Branch Access
	Total Control – Managed Firewall	Unified Threat Management
Network	Software-Defined Wide Area Network (SD-WAN)	Always-on Internet
	Managed Internet	Internet Failover

### BUSINESS CONTINUITY BY NETFORTRIS

Our mission is to keep your business connected to employees, customers, suppliers, as well as vital data and applications. We’ve built a suite of solutions – spanning the tech stack – that can be deployed independently or in combination so that you can maximize uptime.

### WE’VE GOT YOU COVERED FROM CONNECTIONS TO APPLICATIONS

Choose from these business continuity solutions or layer them for a complete disaster prevention plan.

### WHAT HAVE YOU GOT TO LOSE?

Downtime may be more costly than you think. The Cost of Downtime = **Lost Revenue + Lost Productivity + Recovery Costs + Intangible Costs**

## BUSINESS CONTINUITY = BUSINESS AGILITY

✓  
Improved uptime with secure and redundant networks

✓  
Improved productivity with work from anywhere using cloud communications

✓  
Improved oversight with remote management of systems through web portals

### Business Continuity is Your Competitive Advantage

Cloud-based applications, resilient networks and managed security have proved to be the difference between organizations that have failed and those that have persevered. Going forward, they will remain the advantage of those that thrive.

### Why Trust Business Continuity to NetFortris?

We own it! Not only do we take on full deployment and 24/7 management of your solution, we own and operate the infrastructure – hardware, software and network – end to end. And we own it when disaster strikes with industry-leading service level agreements (SLAs).

## SURVIVE & THRIVE WITH BUSINESS CONTINUITY BY NETFORTRIS

Continuity is critical in a connected world. Build your plan from our suite of communications, security and networking solutions.

### Comm-unity UCaaS

Empower your team to call, chat, text, collaborate, conference and more from any Internet-enabled device with Comm-unity, our cloud-based unified communications platform.

### Total Control VPN

Provide your branch locations with secure, scalable and cost-effective IPSec access to your corporate data and applications with our Total Control Virtual Private Network (VPN) solution.

### Total Control Managed Firewall

Secure all inbound and outbound Internet traffic at your geographically diverse locations with our cloud-based Unified Threat Management (UTM) solution.

### Virtual Call Center

Enable your inbound call center to continue to take orders or help customers even in emergencies. Our Virtual Call Center solution lets sales, customer care and help desk agents work from home while monitoring their activity as if they were in the office.

### Managed Internet

Get network resiliency with diverse high-speed primary and backup connections at your headquarters or branch locations. Mix and match access types, including Fiber, Ethernet, T1, Broadband (DSL or Cable) or 4G LTE wireless to meet your needs.

### SD-WAN by NetFortris

Ensure always-on connections with our software-defined wide area network solution. SD-WAN aggregates diverse broadband links to boost bandwidth and add redundancy with seamless failover and dynamic path selection.
