

Solution Sheet

# CORE NETWORK ARCHITECTURE

## BEST OF BREED APPROACH

JUNIPER  
NETWORKS

FORTINET

Our network utilizes leading edge equipment for protection and routing/switching from Cisco, Juniper, Palo Alto and Fortinet. All equipment setup in high availability clusters are in 'carrier hotel' datacenters. You also get all of the following with NetFortris' Network Architecture:

Multiple 10G  
Backhauls

Carrier  
Resiliency

Customer Edge  
security powered by

FORTINET

SD-WAN  
powered by

velocloud™  
vmware®

## Peering with the most visited networks

This provides a more efficient and shorter distance route for customers on our network.

## The Latest Encryption Standards

(SHA256/AES256) are employed on our managed MPLS/IPSec & SD-WAN.

## NATIONWIDE, PRIVATE MPLS BACKBONE

### Coast-to-Coast Protection

- ✓ 40/100 Gig-enabled, Multi-Peering Points
- ✓ Multi Geo-Diverse SD-WAN Gateways
- ✓ Multi Geo-Diverse Firewall Centers
- ✓ PCI-Compliant & Certified
- ✓ Multi-level Dynamic QoS
- ✓ 33 Global SD-WAN Gateways
