

SD-WAN BY NETFORTRIS – A BETTER BUSINESS NETWORK FOR A CONNECTED CLOUD WORLD

You shouldn't have to choose between high-cost private networks or low-cost Internet connections when building your corporate network to handle mission-critical, cloud business traffic. With SD-WAN by NetFortris, you no longer have to.

MAXIMIZE BANDWIDTH, MINIMIZE COSTS, OPTIMIZE PERFORMANCE

SD-WAN, or software-defined wide area networking, offers you a better business network by:

- ✓ Leveraging affordable and widely available broadband connections
- ✓ Aggregating links to boost bandwidth and add redundancy
- ✓ Prioritizing critical applications like voice and video for improved quality of service
- ✓ Simplifying administration with centralized network management

WHY SD-WAN BY NETFORTRIS

Unlike most SD-WAN providers, NetFortris is not a reseller. We can deliver the following advantages and flexibility through our own international SD-WAN backbone.

Our SD-WAN solutions are architected for your environment and overseen by our CISO and CTO.

We connect with you around the world through our fiber backbone with 40+ PoPs and growing.

Our network specialists will fully manage your SD-WAN or co-manage it along with your team.

We host and manage all headend and cloud orchestration components for your deployment.

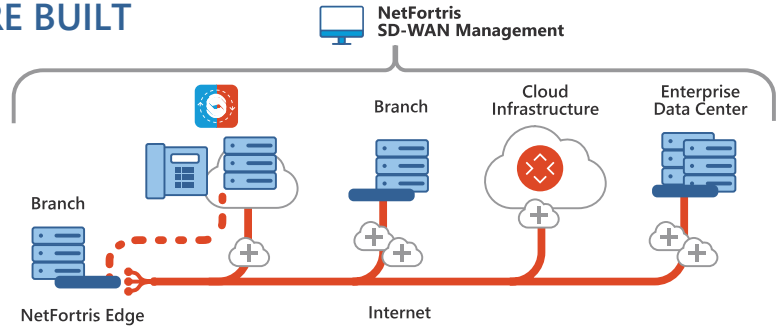

We ensure your SD-WAN is secure and resilient with integrated core network firewalls.

Our SD-WAN and cloud UC platform are on the same network, for a seamless experience.

IMAGINE A NETWORK THAT SOFTWARE BUILT

SD-WAN means your network is managed through cloud software rather than disparate hardware systems. That flexibility enables you to connect branch offices in minutes, provide a high-quality unified communications experience, lower bandwidth and hardware costs, and more!

BENEFITS OF SD-WAN BY NETFORTRIS

SD-WAN provides you with unparalleled network flexibility, security, quality and resilience required in today's cloud-based, connected world.

Bandwidth Aggregation

Aggregate bandwidth using any access type – cable, DSL, 4G LTE – from any service provider.

Zero-Touch Provisioning

Get started fast by connecting our plug-and-play edge appliance to power and Internet.

Integrated Security

Keep critical cloud and peer-to-peer apps secure with integrated next-gen firewall.

Continuous Uptime

Enjoy always-on connections with seamless failover and dynamic path selection.

Centralized Control

Make changes globally or by connection, location, app, device or user with our intuitive portal.

Hybrid WAN Option

Use both MPLS and Internet circuits with a hybrid MPLS + SD-WAN option.

Quality of Service

Improve performance of cloud, voice and video with application prioritization and QoS policies.

Network Visibility

Get unparalleled visibility into your network performance with our deep analytics engine.
