

**BETTER NETWORKING & ANALYSIS,
BETTER BOTTOM LINE**

Enterprise Wi-Fi

Today, wireless networking is more important than ever for organizations that want control and ubiquitous access to their network. Enterprise Wi-Fi offers simple Wi-Fi solutions to empower your organization with actionable insights, networking tools and customer engagement.

BENEFITS AT A GLANCE

➤ **CENTRALIZED CLOUD MANAGEMENT**

View your network in one single pane of glass. Analyze data across your locations to make smart, quick business decisions.

➤ **LOCATION ANALYTICS**

Monitor connected devices, dwell time, and repeat visitors with easy-to-read charts. Compare location data to gather customer engagement trends.

➤ **WIDS/WIPS SECURITY**

Proactively scan for wireless threats with dedicated security radios and auto-containment policies. Facilitate preemptive action against malicious rogue devices.

➤ **BEST-IN-CLASS HARDWARE**

Only you see your emails and personal account, so there's no need to remember/update passwords.

NETWORK CONTROL

With wireless cloud management, your network is all in one place. Change policies, manage app usage and gather valuable customer engagement data for maximum ROI.

DEDICATED SECURITY

NetFortris access points include dedicated security radios, scanning and mitigating wireless threats. Whether it's a POS device or client endpoint, be confident in protecting your employees and customers.

BETTER GUEST EXPERIENCE

Customers are the lifeline of your business, so give it an edge. Create engaging opt-in features and sign on experiences, with customizable captive portals, keeping corporate traffic secure via SSID segmentation.
