

MANAGED VIRTUAL FIREWALL

SD-WAN Firewall

Managed Virtual Firewall is an exciting addition to our SD-WAN suite, delivering secure SD-WAN for organizations with virtualized and private network environments. NetFortris leverages virtualized next-generation firewalls integrated with our SD-WAN platform to increase security capabilities, including:

- **FORWARD ERROR CORRECTION**
- **DYNAMIC TRAFFIC STEERING**
- **TAILORED BUSINESS POLICIES**
- **INTRUSION PREVENTION**
- **ANTI-MALWARE**
- **ZERO-DAY THREAT DETECTION & NEUTRALIZATION**

SD-WAN + SECURITY IN ONE DEVICE

Our turnkey security solution is built into your edge device.
