

**A BETTER BUSINESS NETWORK  
FOR A CONNECTED CLOUD WORLD**

## SD-WAN

You shouldn't have to choose between high-cost private networks or low-cost Internet connections when building your corporate network to handle mission-critical, cloud business traffic. With SD-WAN, you no longer have to.

### **MAXIMIZE BANDWIDTH...MINIMIZE COSTS...OPTIMIZE PERFORMANCE**

SD-WAN, or software-defined wide area networking, offers you a better business network. With SD-WAN, you can:

- ✔ Leverage affordable and widely available broadband connections
- ✔ Aggregate links to boost bandwidth and add redundancy
- ✔ Prioritize critical apps like voice/video for improved service quality
- ✔ Simplifying admin with centralized network management

### **WHY NETFORTRIS SD-WAN**

Unlike most SD-WAN providers, NetFortris is not a reseller. We can deliver the following advantages and flexibility through our own international SD-WAN backbone:

#### **EXPERT OVERSIGHT**

Our SD-WAN solutions are architected for your environment and overseen by our CISO and CTO.

#### **FULLY OR CO-MANAGED**

Our network specialists will fully manage your SD-WAN or co-manage it along with your team.

#### **SECURE IP CORE**

We ensure your SD-WAN is secure and resilient with integrated core network firewalls.

#### **GLOBAL REACH**

We connect with you around the world through our fiber backbone with 40+ PoPs and growing.

#### **NATIVE HOSTING**

We host and manage all headend and cloud orchestration components for your deployment.

#### **INTEGRATED UC**

Our SD-WAN and cloud UC platform are on the same network, for a seamless experience.

# The SD-WAN secret: it's built by software

The secret behind SD-WAN is that it creates a network that's managed through cloud software rather than disparate hardware systems, giving you the flexibility to:

- **CONNECT BRANCH OFFICES IN MINUTES**
- **PROVIDE A HIGH-QUALITY UNIFIED COMMUNICATIONS EXPERIENCE**
- **REALIZE LOWER BANDWIDTH AND HARDWARE COSTS**

## BENEFITS OF SD-WAN

SD-WAN provides you with unparalleled network flexibility, security, quality and resilience required in today's cloud-based, connected world.

- **BANDWIDTH AGGREGATION**  
Aggregate bandwidth using any access type—cable, DSL, 4G LTE—from any service provider.
- **CONTINUOUS UPTIME**  
Enjoy always-on connections with seamless failover and dynamic path selection.
- **QUALITY OF SERVICE**  
Improve performance of cloud, voice and video with application prioritization and QoS policies.
- **ZERO-TOUCH PROVISIONING**  
Get started fast by connecting our plug-and-play edge appliance to power and Internet.
- **CENTRALIZED CONTROL**  
Make changes globally or by connection, location, app, device or user with our intuitive portal.
- **NETWORK VISIBILITY**  
Get unparalleled visibility into your network performance with our deep analytics engine.
- **INTEGRATED SECURITY**  
Keep critical cloud and peer-to-peer apps secure with integrated next-gen firewall.
- **HYBRID WAN OPTION**  
Use both MPLS and Internet circuits with a hybrid MPLS + SD-WAN option.
