TAKE YOUR OFFICE PHONE WITH YOU WHEREVER YOU GO

In today's always-on, mobile and distributed work culture, NetFortris Comm-unity helps you to be responsive, productive and connected inside the office or out.

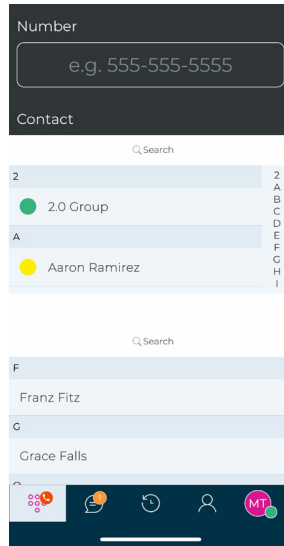

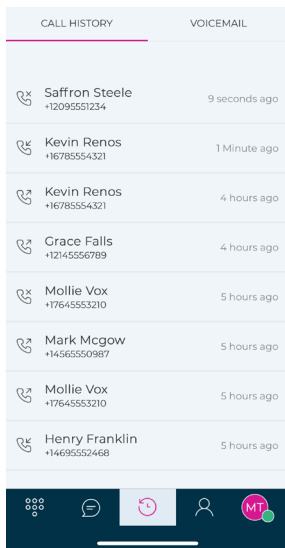

- Make and receive calls using your office extension & caller ID
- Use the device you love most — your own!
- Keep CommUnity running in the background so you never miss a call or chat
- Use visual voicemail to see your messages, including time and duration
- Keep your mobile number private.
- Chat with users and sync conversations to CommUnity Desktop.
- Put calls on hold, transfer them to colleagues, or to your own office phone.
- Control when you're available with statuses.
- Add personal contacts separately from the corporate directory.

ACCESS ESSENTIAL COMMUNICATIONS TOOLS ON THE GO

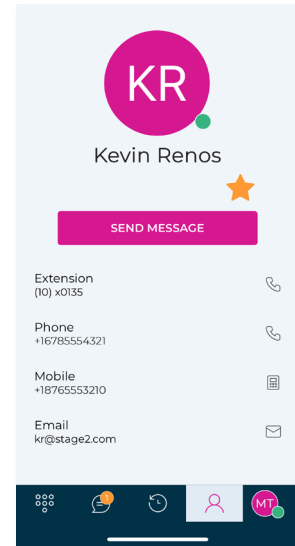

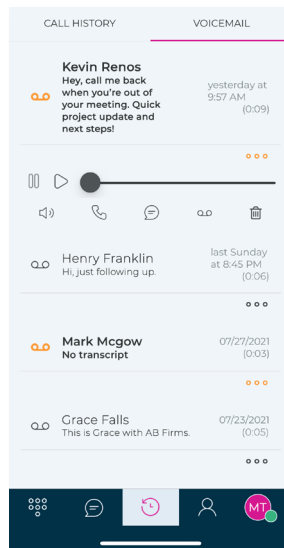

CommUnity Mobile is easy to use and simple to manage using an intuitive graphical interface. It is available for iOS and Android devices along with your current CommUnity subscription.

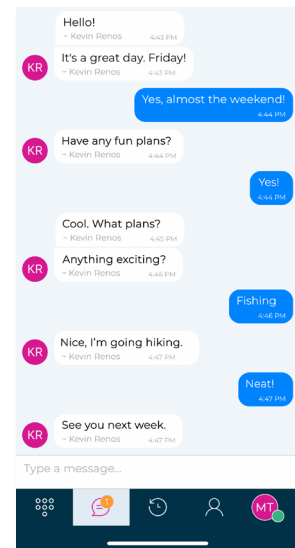

- **CALL**
Place and receive inbound and outbound calls.
- **CALL HISTORY**
Access records of inbound, outbound and missed calls.

- **CALL TRANSFER**
Transfer calls to other members of your team.
- **INTEGRATED VOICEMAIL**
Access voicemails on your desktop or mobile device.

- **PERSONALIZATION**
Customize the mobile app with your information.
- **CHAT**
Team messaging and collaboration
